

April 2023

Dear valued customer and partner,

A brand migration project is underway to migrate the Square D brand pressure, limit, and float switches to the Telemecanique Sensors brand. We expect this rebranding to happen during July 2023. As many of you already know, the Square D pressure, limit and float switch lines have been a part of Telemecanique Sensors for many years.

The brand change won't affect any technical aspects of the products you know today. The range names, part numbers, the way you purchase, and receive support; will all stay the same. The same great product will be provided under the name of Telemecanique Sensors. We are only changing the labelling on the products, instructions sheets, and product literature, to reflect the Telemecanique Sensors branding.

All Square D brand limit, pressure and float switches families will be included in the migration. These products include: NEMA limit switch 9007, L100/300, L140/L2153, L525; NEMA pressure and vacuum switches 9012G, 9016G, ACW and ADW. Water pressure switches 9013F, 9013G, FSG, FYG, FHG and FRG, as well as NEMA float switches 9036, 9037, 9038 and 9049 and 9998 accessories.

While the brand is changing, our focus and commitment to excellent quality and customer service will remain unwavering.

If you have questions or need additional information, do not hesitate to contact your current representative for Square D and Telemecanique Sensors products. Thank you for your trust and confidence, we appreciate your business and value your continued support.

About Telemecanique Sensors

Founded nearly 100 years ago, Telemecanique Sensors specializes in sensors and sensor-related technology. Telemecanique Sensors is a global player, present in more than 20 countries, with products distributed worldwide through a broad network of partners.

As a global leader in the sensors business, we help our customers select the right technology to get the best performance and reliability from their machines. Focused on 3 core values – Simplicity, Proximity, and Expertise – we have become experts in factory automation sensors as well as specialists in demanding applications, making our customers' lives "Simply easy!"
